

Vaztech Integrated Solutions

For all of your computer / network / voice / data requirements

Whatever your issues... We're Here to Help!

At VazTech Integrated Solutions, we use our expertise to keep your business running smoothly and efficiently. We will recommend and implement the best solutions for your needs. Whether it's hardware, software or networking, we can help.

We work with you on all your data, internet, telecommunications, cellular and VOIP needs. We have partnered with numerous providers to give you the best service and pricing possible, and to get you the "best fit" solution.

We also create custom software applications, when your business has those special needs that are not provided by "off-the-shelf" solutions.

Hardware/Software Support

We make your existing equipment work at it's peak, and will also provide experienced recommendations when it comes time to replace or add equipment. We work with all types of hardware from desktop computers to back end servers, routers, firewalls and switches. Call or e-mail us now for a **FREE EVALUATION**.

Voice/Data/Internet

Vaztech has partnered with an extensive list of providers (see back page) to give you the best solution for all of your telecommunications, PBX, internet, wireless internet, data and cellular needs.

We take all the guesswork out of finding the

right provider to handle your needs. Vaztech will work with you to find out what your current and future needs are. We will then find the best providers that match your needs. You will be able to easily compare what different providers offer, their pricing and service, and pick the best one for your business. Vaztech allows you to keep working on your daily business, because we do all of the research for you.

Web Hosting/Domains/E-mail

Vaztech provides you with a full service internet presence. We take the mystery out of the web, and will show you how easy it is to have a professional company presence on the internet. Our rates are very competitive, and with 99.9% up-time, our servers are always running.

Our services include:

- Domain registration
- Web hosting
- Web design
- Hosted E-mail
- Web backups
- Email Newsletters
- Fax via Internet
- Shopping carts

Custom Software

Vaztech can provide custom software if your needs are not met by "off-the-shelf" products. We have created numerous software systems to provide specialized functionality. These systems are easy to use, provide all of your requirements, and are still extremely affordable.
